A QUESTION OF MEANS AND ENDS. There ago prohi liberte who, while commaling the course of The Oneson An in the fight it has long been making against he liquir traffic, never the loss are at posed to a life ise it because, as they thank, it does not push its principles for enough. We would like to press upon the mints of our friends the sup We would like to gest on that the question is one of means and ends. What ought a be attempted is the thing press prohibition as the only remedy do not, as we think, consider anticiends the many parts of a complex problem. They do not think of the demand, but direct all their energles against the supply. Yet so long as the doriate how car the supply possibly be cht off? The most practicable method, then seems to be to lax, to regulate, to restrain We are for doing the utmost against the liquor traffic that can be done in the circumstance stiompting to do more than can be done.
